

135i & 150i Series

Thermal Storefront Doors

St. Thomas More Catholic Church
Manhattan, KS

Manko's thermal "i" series entrance doors are ideal for projects seeking a thermally efficient solution. These doors are 2 1/8" thick, and come in two stile widths; 3 1/2" medium stile (**135i series**) and 5" wide stile (**150i series**). Both doors come standard with 10" bottom rail, however additional sizes are available.

All of Manko's doors are fabricated utilizing a telescoping mortise and tenon joint coupled with a horizontal shear block, and then further reinforced with a 3/8" steel tie rod and sleeve ensuring long lasting durability and structural integrity. Each set of Manko's pairs of doors come standard with adjustable astragals and poly-pile weathering.

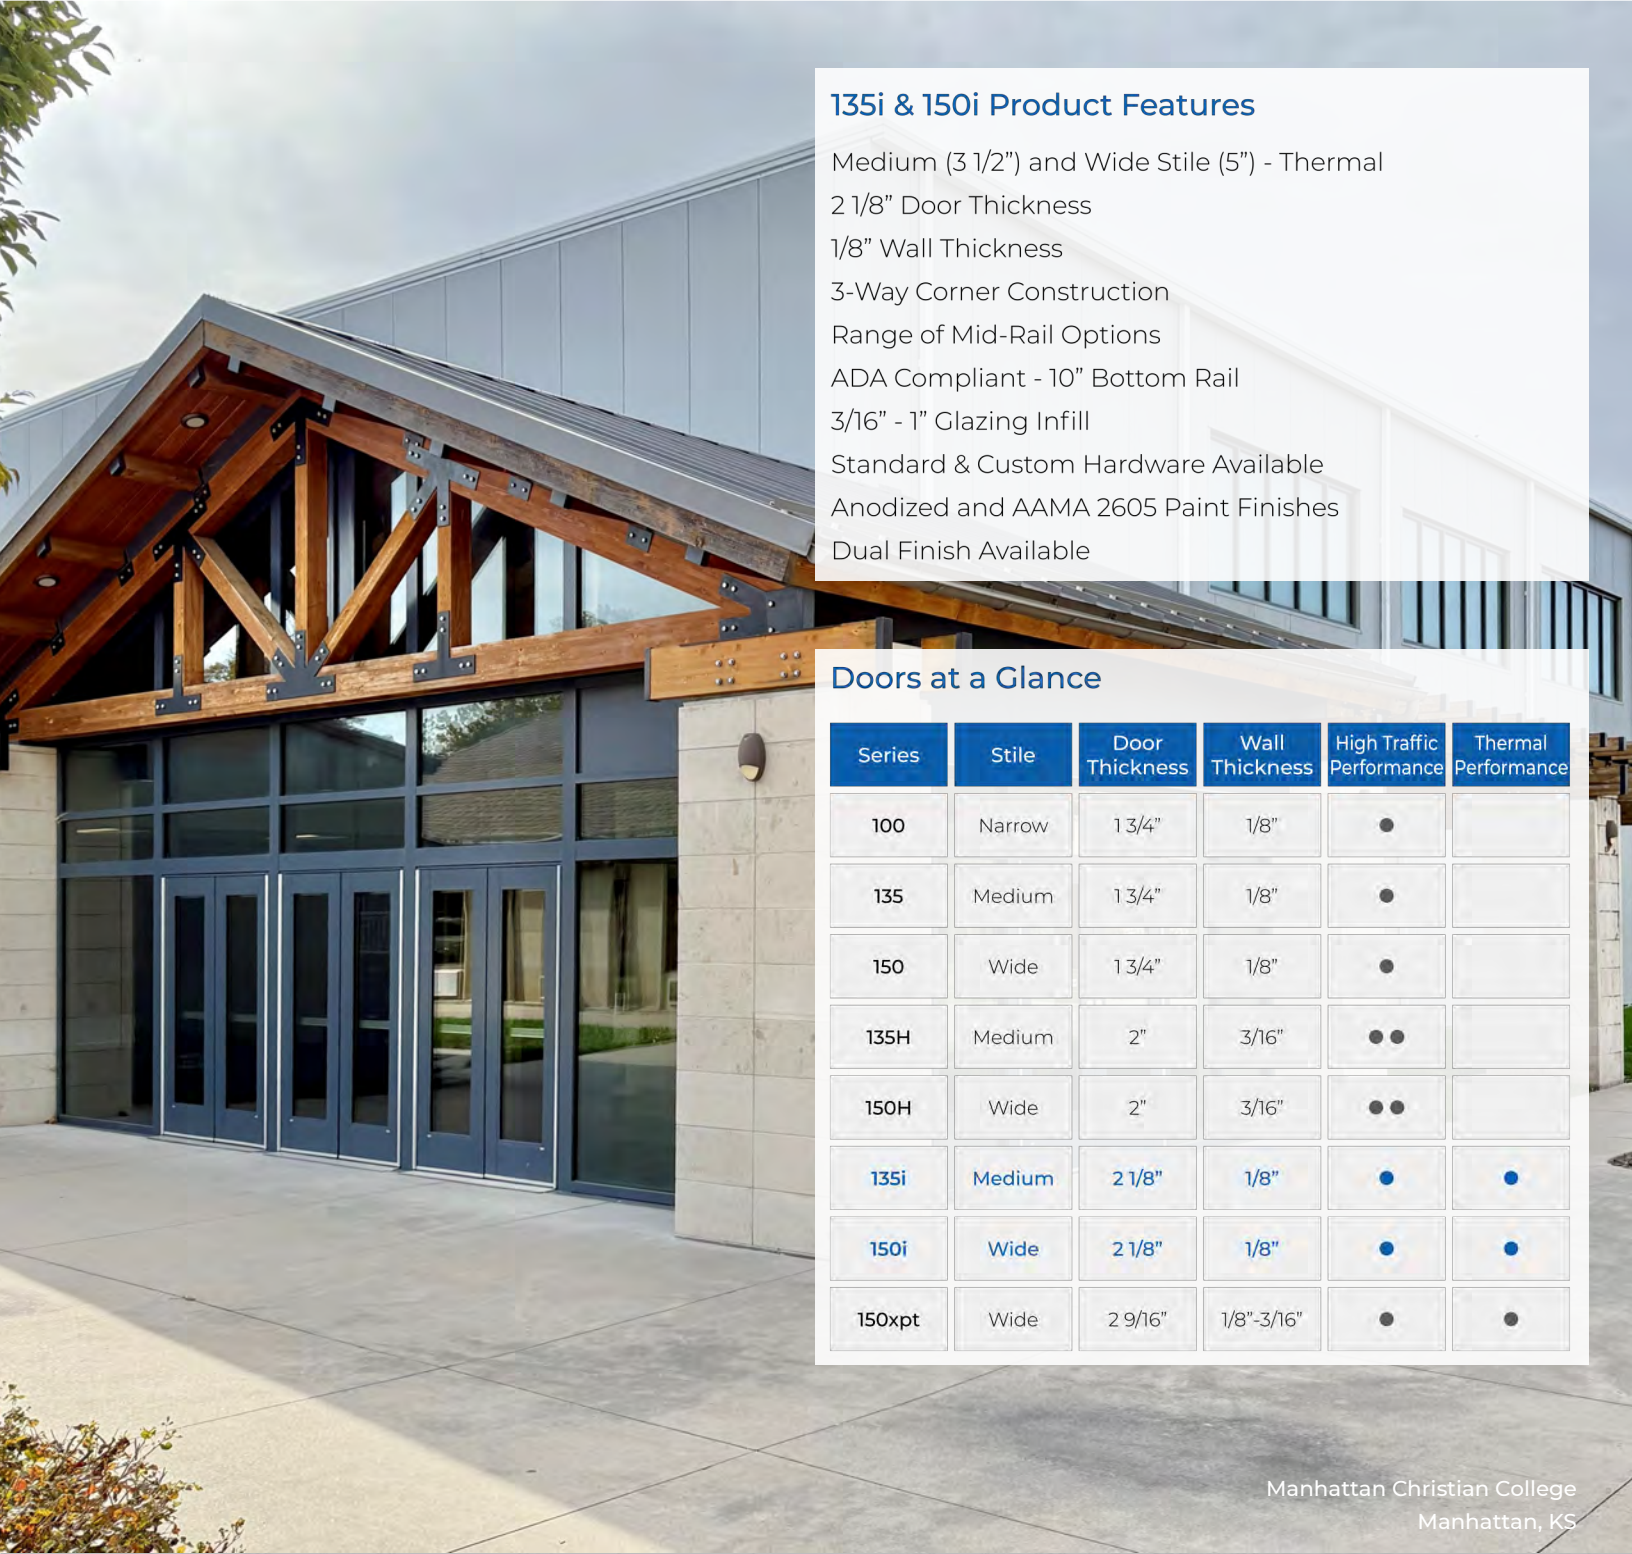

Multiple hardware options are available, however hardware compatibility with a specific door series must be taken into consideration, whether that be manufacturer's standard hardware or custom hardware.

These thermal doors are easily integrated with Manko' high-performance storefront and curtain wall systems

3 1/2" **135i Series**

5" **150i Series**
