

175 Series

Interior Mall Slider

Private Residence
Manhattan, KS

Narrow Stile Panels | Mall Slider | Interior Stackable System

Designed for interior pass-through access, the narrow stile panels slide horizontally and can be recessed into finished walls, clearing an entire opening. The **175** series mall slider configuration allows for multiple panels sliding and stacking to one or opposite sides by way of separate head tracks and ADA compliant sill tracks. Each door panel is supported by a center pivot spring loaded tendon wheel assembly, and two self-contained stainless steel ball bearing rollers. Ideal for interior retail stores and interior room dividers.

The interior mall slider system is easily integrated in to Manko's systems, or can be installed standalone. Please contact Manko for sizing limitations and design considerations.
