

2100 & 2200 Series

Sliding Patio Doors

Davenport Lofts
Tulsa, OK

Exterior Patio Sliders | AW Performance Ratings | 5 1/4" Frame Depth

The **2100** and **2200** series patio sliders come standard with a 5 1/4" frame depth and standard 12psf rated water resistant sill. Designed to maximize interior and exterior space yet allow for horizontal ventilation and passage, these doors slide on tandem stainless-steel rollers for ease of operation. Common configurations include XO, OX, OXO, and OXXO (O = Stationary, X = Operable). The **2200** series is identical to the **2100** series with the exception of the increased structural reinforcement at the interlocking rail of the operating sash, yielding a better wind loading system.

These patio slider systems are easily integrated into Manko's storefront and curtain wall systems, or can be installed standalone. Please contact Manko for sizing limitations and additional design considerations.

Performance Ratings

AAMA AW40 - 2100 Series

AAMA AW60 - 2200 Series

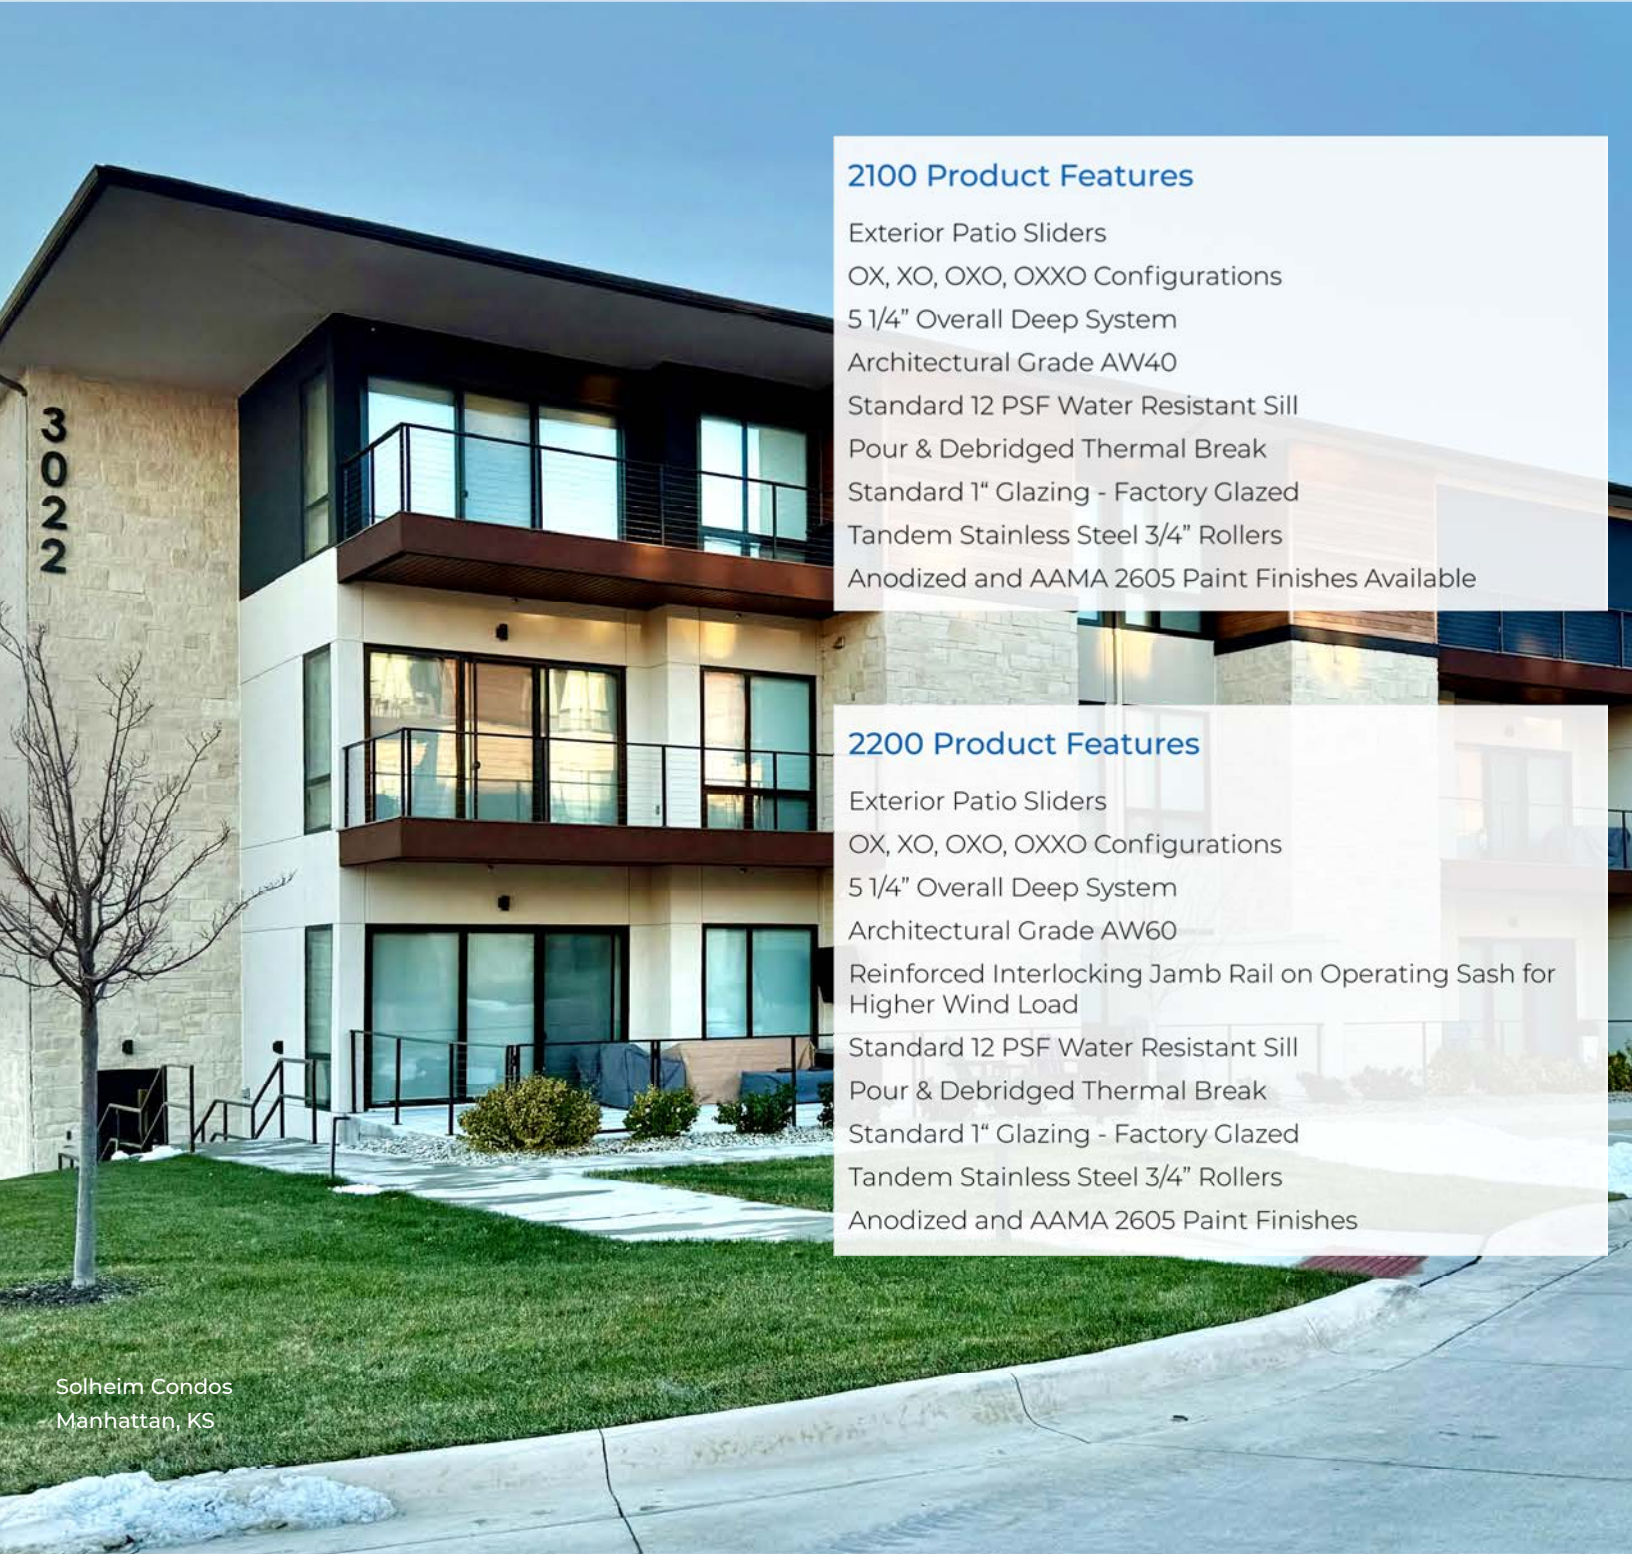

Operating - AAMA / NWWDA 101/I.S.2-97

Air Infiltration - ASTM 283

Water Resistance - ASTM 331

Life Cycling Testing - ASTM 910

* Minimum Gateway Performance Values tested, product meets or exceeds values
