All values shown are calculated with Manko standard warm edge insulated glass units

*U-Values and SHGC have been calculated using Manko standard insulated glass unit construction with Tri-Seal airspace and standard sealants. Substitution of different airspacers and/or sealants will effect values. All values listed have been calculated using standard NFRC 100 and NFRC 200 procedures. Some values listed have been extrapolated for clarity and ease of presentation. All values listed have been calculated at standard NFRC Gateway Sizes.
