

450 Series

Storefront

Edge Complex
Manhattan, KS

When it comes to utilizing a storefront system on your project, Manko has a wide variety of options to choose from, including our non-thermal 450 series. This system has been a staple in the Manko portfolio for a number of years, providing projects a quality, cost-effective system that can meet non-thermal framing needs. The 1/4" glaze 450 series has the typical storefront depth of 4 1/2" with an option for either a 1 3/4" (**450-1**) or 2" (**450-2**) profile. With the system's non-thermal design, the 450 series is typically utilized in interior applications where a thin profile system is desired. Manko has also developed a multi-glaze system (**450-3**) that will allow for thicker glazing options from 3/8" to 11/16", including LCG® Switchable Glass or EntryGuard®.

450-1 (1 3/4" X 4 1/2")

450-2 (2" X 4 1/2")
