

# 725i Series

## Historic Aluminum Window

Memorial Hall  
Kansas City, KS

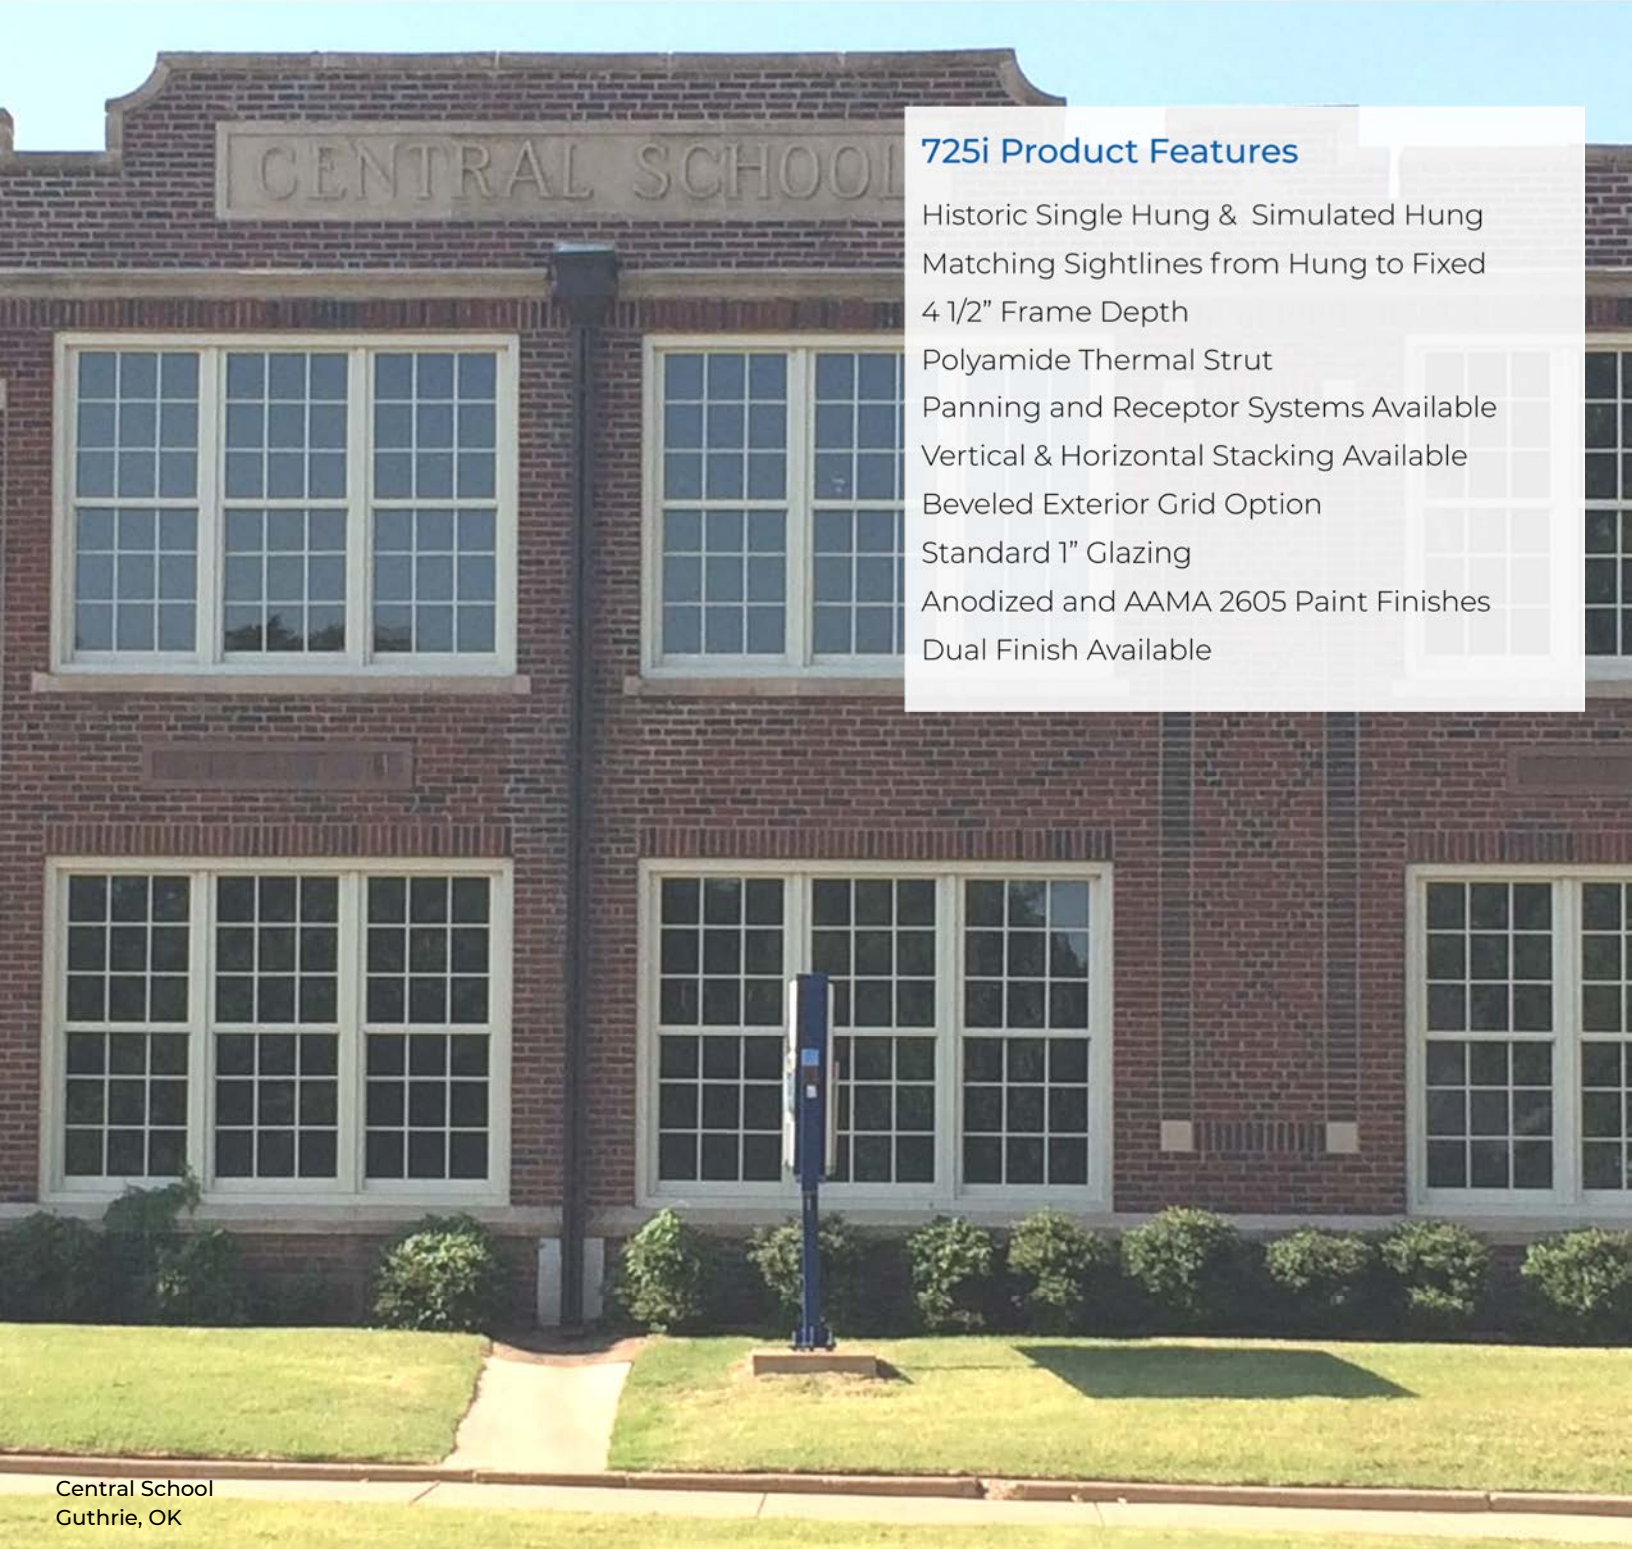

The redesigned **725i** series window was developed with historic window profile consideration in mind, and is available as either a true single hung or fixed simulated hung. The single hung and fixed options offer matching sightlines, allowing these two options to be seamlessly integrated. With a 4 1/2" overall frame depth, this window uses a polyamide thermal strut to provide an efficient, yet structurally sound window. For unique restoration projects, custom profiles may be available if needed to better match your projects' existing windows.

**725i Single Hung**

**725i Fixed Simulated Hung**
