Curtain Wall Installation (12" Blade, Horizontal Orientation)

Manko Windows' single blade **VersaShade Sunshade** was developed to be integrated into our curtain wall system, as well as storefront and window wall systems with limitations, please consult Manko. The VersaShade design allows for installation in either a horizontal or vertical orientation, at multiple different angles, with four standard blade depth options. Standard finish options consist of Class 1 Anodized as well as AAMA 2605 Compliant Fluoropolymer Paint Finishes.

The VersaShade's universal components, integral attachment, and ease of assembly allow for efficient fabrication and installation.

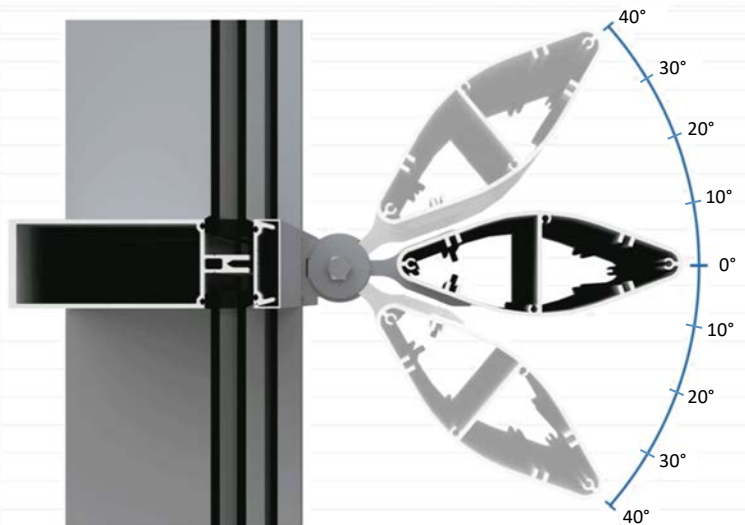

Whether you are looking for a unique design feature or to reduce solar heat gain and maximize shading, look no further than the single blade VersaShade.

VersaShade Product Features

- Vertical or Horizontal Orientation
- Adjustable Orientation
- Standard Blade Depths (8", 10", 12" & 14")
- Reduces Solar Heat Gain
- Increases Daylighting
- Increases Occupant Comfort
- Contributor to LEED Credits
- Class 1 Anodized Finishes Available
- AAMA 2605 Paint Finishes Available

Multiple blade sizes with different orientations and multiple angle settings allow for nearly endless possibilities to create the visual effects, sightlines and shading patterns that you desire.

Versashades can help earn Leadership in Energy and Environmental Design (LEED) credits via Materials and Content (Recycled Content), Energy and Atmosphere (Optimize Energy Performance) and Indoor Environmental Quality (Daylighting and Views).

Nine Preset Angles - Increments of 10°
from Positive 40° to Negative 40°
